

MilkMoreZyme⁺

"NATURAL SOLUTION FOR INCREASING LACTATION"

India is one of the largest milk producing countries in the world. Milk production has been a source of livelihood across the nation. Profitability and sustainability is one of the key challenges by the farmers because milk price is based on the composition of fat percentage and SNF percentage. This has played a huge role in pricing the dairy product. Government of India has come out with strict norms to determine milk price and rates based on fats and SNF percentages. STS biotech using biotechnological tools has developed the product to address the challenges faced by the farmers.

MILKMOREZYME⁺ is a potent polyherbal formulation to increase milk production with increase in SNF. The synergistic combination of herbs provides unmatched performance in the milking cow. The STS product acts as a potent antioxidant and reduces free radical stress induced by metabolism and other environmental factors.

Packing Available
1kg, 5kg, 10kg, 25kg

***NOT FOR HUMAN USE**

*** FOR ANIMAL FEEDING ONLY**
